COURSE, YEAR & SECTION: *BSIS-2B*

Week2_SemanticMultimedia | Week2_Reflection

In Week 2, I learned how to structure web pages using HTML5 semantic elements such as <header>, <nav>, <main>, and <footer>, along with embedding multimedia content. This taught me how semantic tags make a website more meaningful and accessible compared to using generic containers. A challenge I encountered was handling broken media links when files were moved or misplaced. I resolved this issue by double-checking relative file paths and keeping my assets folder neatly organized. To improve my output, I added clear alternative text (alt attributes) for accessibility and ensured my multimedia elements fit neatly within the page layout. This lab helped me understand the importance of clean document structure and proper asset management.
